   STYLED COMPONENTS
BACKEND
   NODEJS
   NESTJS
   EXPRESS
REQUISIÇÕES
   GRAPHQL
   REST APIs
DATABASE
   SQL
   NOSQL

# My Story

Since I was kid, I've been fascinated by how things are done, so at 11 years I started programming games in Unity, a game engine, and I never stopped again. When i turned 15 years I get employed in a company as a 'young apprentice' Frontend, my first contact with Javascript, where I also completed a Rocketseat bootcamp and specializing in Javascript, I took JustJavascript course (made by Dan Abromov, current member of Team Core from ReactJs on Facebook) where I learned to read the code with different eyes.

# Experiência

2019 - 2022

I started with short experience, after 6 intensive training months, I was managing and developing mobile application, about 3 mobile apps (1 large scale) and 2 websites (1 large scale) was made. I worked as frontend in general, mobile, web frontend and sometimes I supported backend programmer with PHP logics.

# HOBBIES

MUSIC
   GUITAR
DESIGN
   UI
   UX
HARDWARE
   ARDUINO

# LANGUAGE

PORTUGUÊS (NATIVE)
INGLÊS (INTERMEDIATE)
